Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)					
	09/683,027	MALINOWSKI ET AL.					
Office Action Summary	Examiner	Art Unit					
	Luan Thai	2891					
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	correspondence address					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status							
1) Responsive to communication(s) filed on 20 Ju	ne 2005						
<u> </u>	action is non-final.						
<u></u>		osecution as to the ments is					
Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.							
Disposition of Claims	,						
4)⊠ Claim(s) <u>1-33</u> is/are pending in the application.							
	4a) Of the above claim(s) is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.

DETAILED ACTION

Request for Continued Examination

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/20/05 has been entered.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin (6,180,426 of record) in view of Arledge et al. (6,493,198).

The figures and reference numbers referred to in this office action are used merely to indicate an example of a specific teaching and are not to be taken as limiting.

Regarding claims 1-33, Lin discloses a dual chip stack mounted on a module 320 (see figure 3), comprising: a semiconductor chip (310) including an integrated circuit having at least one first electrostatic discharge sensitive device (e.g., a transistor, Col. 8-9); a non-semiconductor chip (305), attached to the semiconductor chip (310), the non-

Art Unit: 2891

semiconductor chip (305) having at least one second electrostatic discharge sensitive device (e.g., a transistor, Col. 8-9) and at least one first electrostatic discharge protection device (e.g., 414/418 in figures 4a-4b) electrically connected to the first electrostatic discharge sensitive device (via conductive bumps 384/315/394, see figure 3). Lin further teaches a second electrostatic protection device electrically connected to the second electrostatic discharge sensitive device (Col. 6, lines 9-67 and Col. 7, lines 1-67, Col. 8-9). Lin, however, does not explicitly teach the electrostatic protection device (ESD) being a spark gap having a substrate formed of an electrically insulating material.

A spark gap, as disclosed by Arledge et al. (figures 1-3), being formed on a dielectric substrate (20) (Col. 2, lines 31-67), however, is commonly used in semiconductor art, as an electrostatic protection device (ESD), (see Arledge et al.' Col. 2-3). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to use the spark gap as an electrostatic protection device (ESD) in Lin's device since such spark gap is conventionally used in semiconductor art as an electrostatic protection device (ESD), as taught by Arledge et al.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luan Thai whose telephone number is 571-272-1935. The examiner can normally be reached on 6:30 AM - 5:00 PM, Monday to Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bradley W. Baumeister can be reached on 571-272-1722. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
